

WAS-MIP

Laxmi Prasad Upadhayay
Planning Monitoring & Evaluation Section
DWSSM

Project detail-WASMIP-II

- MoU signed at 2nd April, 2018
- Project period upto December, 2022
- Goal of the project:
 - To enhance the capacity of DWSSM & NWSSTC for supporting WUSC in semi-urban towns across the country
 - Technical Support Mechanism as part of Support model

Project detail-WASMIP-II

- Outputs of the project:
 - Baseline survey & capacity assessment of DWSSM, WSSDO, WUSC.
 - Supporting capacity of DWSSM regarding O&M and Management of WUSC in semi-urban towns is strengthened.
 - Implementing capacity of NWSSTC regarding the training for WUSCs in semi-urban towns is strengthened.

Principle of WASMIP

- **Support model**

- WASMIP-I: Construction of Collection/Service Reservoir, Water Treatment Plant (Dhulabari wsp, Jhapa, Bharatpur wsp, Chitwan)
- Providing Water quality test kit, installation of Chlorination unit, Flow meter, Bulk water meter etc.

- **Management model**

- Capacity building through training, developing O&M manual, SoP etc.

Project support to WUSC-hardware support

- Support to 68 WUSC
 - F/Y 074-75- NRs. 20 million
 - F/Y 075-76- NRs. 9 million
 - F/Y 076-77 & 077-78 Budget allocated 15/15 million each year but due to lack of demand, Covid pandemic & procurement issues no expenditure

Need of the Program

- Access & supply led support mechanism
- Least priority to O&M (Government & utility operator both)
- Always demanding for new project (extension, Rehab, Service level improvement)
- Lack of utilizing the existing O&M manual, hand over inspection prepared by DWSSM (12 volume of Design Guideline)
- No post construction support for the completed water supply projects (WUSC should operate & maintain without spare parts, weak technical, financial & managerial capacity)

WUSC Perception towards the Program

- Forever Donor
- Dependency- request for Bleaching powder to JICA (we have sufficient back up at Biratnagar & Kathmandu)
- No use of O&M manual
- Even less priority to install the provided material (flow meter, Bulk meter, Chlorination unit etc.)

Annual Budget Speech-2021/2022

Capacity building of WUSC for sustainable Water Supply services

खानेपानी सेवा विस्तार तथा पुनर्स्थापन

७६० आयोजना निर्माणाधिन रहेको

१९५ आयोजना सम्पन्न हुने

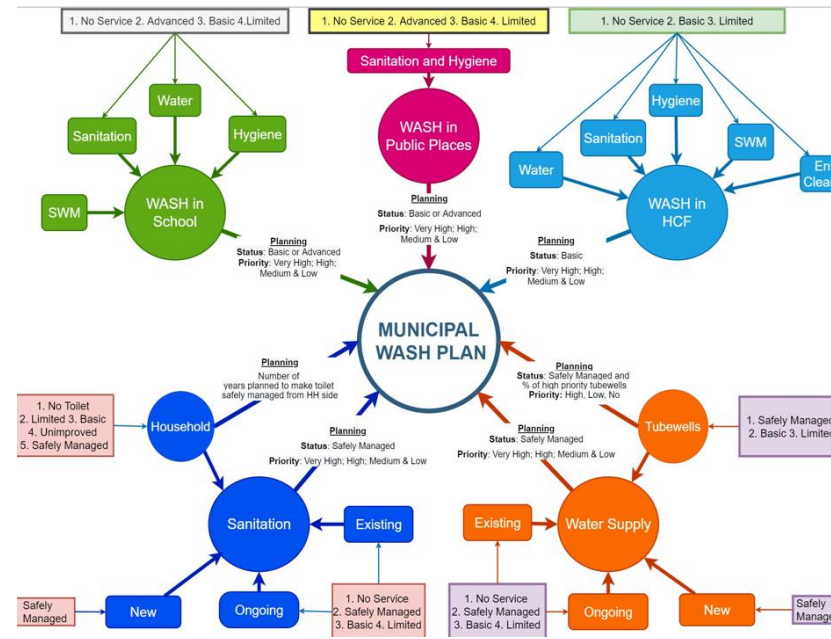

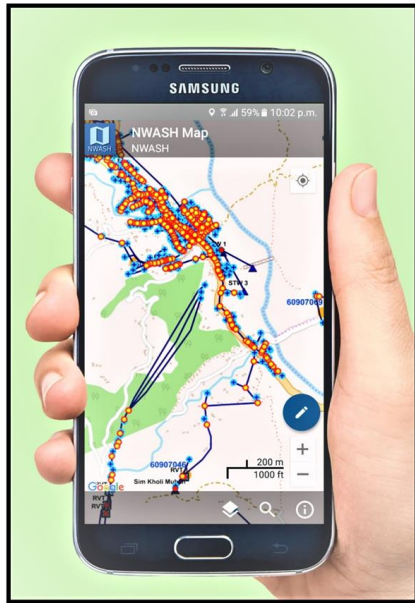

रु. ३ अरब २९ करोड

१,५५,५००

Annual Budget Speech-2021/2022

Capacity building of WUSC for sustainable Water Supply services

WASH Plan
preparation of 200
local bodies will be
prepared

Annual Budget Speech-2021/2022

Capacity building of WUSC for sustainable Water Supply services

१८६५ जना

राष्ट्रिय खानेपानी तथा सरसफाइ
तालिम केन्द्र , WASMIP,
ISSAU बाट उपभोक्ता
समितिको क्षमता विस्तार
लक्षित कार्यक्रमहरु संचालनमा
रहेका

Way forward

- Federal context & WUSC support (better to support local bodies)
- Temporary project offices (20 FWSSMP) have no responsibility of Repair & rehabilitation
- Provincial Division offices- have funding on repair & rehabilitation
- Local level government -capacity strengthening, WASH Plan

Thank you
